

## Stop Child Marriage

This story takes place in a remote village where all the people were in support of child marriage.

The children living there were married in the age of 5 to 10.

A girl named Mina was also going to be married. She was just 7 years old. She was going to be married to a boy Binad. He was just 8 years old and he was unhappy to be married and was against child marriage but he was unable to do anything because in that village there was no facility of post office or any communicating device.

In the city some people against child marriage got to know about this by someone and they wanted to end child marriage in that village. In the village all the preparations were made and they were all ready for the marriage. The people were coming from the city and when they reached there the children were forcefully being taken to the temple for the marriage. Then the people of the city said "stop this marriage it

wrong" the villagers said "who are you to say that it is our rule and we will follow it" Then the villagers became angry and tried to beat the people of the city then suddenly the leader of the villagers said "stop lets hear what do they want to say" then the people of city said "It is wrong to do child marriage because they are small to understand this all and it also affects their health, population and resources and it is also wrong in law and you all can be arrested so we request you to stop this all" Then the villagers understood this all and stopped doing child marriage and started educating their children.

The end
